

Serial No. 09/731,110

Atty. Docket No. 19336-1574001

AMENDMENTS TO THE CLAIMS:

This listing of claims will replace all prior versions, and listings, of claims in the application:

LISTING OF CLAIMS:

---

Claims 1-10 (cancelled).

Claim 11 (new). A system for providing a directory of contact information for telecommunications devices, said system comprising:

means for interfacing with one or more telecommunications service provider stations to collect contact information from said telecommunications service provider stations; and

a central network station connected to said means for interfacing to receive said contact information, said central network station including means for allowing access to said contact information.

Claim 12 (new). The system of claim 11 wherein said means for interfacing includes a router switch station.

Claim 13 (new). The system of claim 11 wherein said means for interfacing poll said telecommunications service provider stations at selectable frequencies.

Claim 14 (new). The system of claim 11 wherein said means for interfacing poll said telecommunications service provider stations one or more times per day.

Claim 15 (new). The system of claim 11 wherein said means for interfacing interfaces with one or more wireless telecommunications service provider stations and collects contact information for wireless telecommunications devices.

Claim 16 (new). The system of claim 11 wherein said central network station includes means for storing said contact information.

Serial No. 09/731,110

Atty. Docket No. 19336-1574001

Claim 17 (new). The system of claim 16 wherein said central network station includes means for enabling a device user to enter data and update certain stored contact information.

Claim 18 (new). A method for providing a directory of contact information for telecommunications devices, said method comprising:

providing means for interfacing with one or more telecommunications service provider stations;

using said means for interfacing to collect contact information from one or more telecommunications service provider stations; and

providing access to said contact information via a central network station.

Claim 19 (new). The method of claim 18 wherein said means for interfacing includes a router switch station.

Claim 20 (new). The method of claim 18 wherein collecting contact information includes polling said telecommunications service provider stations at selectable frequencies.

Claim 21 (new). The method of claim 18 wherein collecting contact information includes polling said telecommunications service provider stations one or more times per day.

Claim 22 (new). The method of claim 18 wherein collecting contact information includes collecting contact information for wireless telecommunications devices from one or more wireless telecommunications service provider stations.

Claim 23 (new). The method of claim 18 further comprising storing said contact information in said central network station.

Claim 24 (new). The method of claim 23 further comprising enabling a device user to enter data and update certain stored contact information.
